## INTRODUCTION

KUBIK Demountable Office Partition Systems are designed to meet the particular needs of office, corporate, commercials, healthcare and banking. It provides the ultimate flexibility in design.

KUBIK Demountable Office Partition Systems are engineered for speed and ease of installation, when installed properly, the unique extrusion profiles have been designed so that they can be configured in an infinite number of combinations and incorporated with almost any other material or finish.

The profiles are usually cut on site, making it possible to incorporate last minute changes in layout or to adjust to site conditions without affecting the cost or project completion dates.

Our commitment is to provide regular introduction of new designs, new profiles with customer satisfactions. We are happy to work with architects and designers and to customize profiles in order to realize their design concepts. Each of our partitioning systems has been developed to be fully compatible with a number of different door types, giving you the flexibility to design a workable space that is both practical and stylish.

KUBIK Hardware is a range of premium door hardware, Our product has been cleverly designed and easy to understand, enabling designers to fully express their creativity without the constraints of factory tooling, moulding and pre-fabrication lead time.

All KUBIK products comes in a wide range of styles, finishes and functions that will complement and enhance any projects.

KUBIK has several systems that are able to provide both at the same time as offering design creativity and flexibility. Our full time design staff provides a comprehensive CAD support service and any other tender documentation can be provided upon request. Our project and technical staff are available at any given time, in any location, to provide a technical support service whenever necessary.

## OUR MISSION

KUBIK will ensure the longevity of company through repeat and referral business achieved by customer satisfaction in all areas including timeliness, attention to detail and service-minded attitudes.

KUBIK team will ensure to achieve goal and mission by continuously self-improvement, growth in our operations and employees; while maintaining profitability to the benefit of our prestigious customers, employees and community.

KUBIK will maintain the highest levels of professionalism, integrity, honesty and fairness in our relationship with our Architects, Interior Designers, PMC and End Clients.

## OUR VISION

Our vision serves as the framework for our road map and guides every aspect of our business by describing what we need to accomplish in order to continue achieving sustainable, quality growth.

People - Be a great place to work where people are inspired to be the best they can be.

Portfolio - Bring to the world a portfolio of quality partition products that anticipate and satisfy Architect's, Interior Designer's, Project Management Consultant's & End user's desire and need.

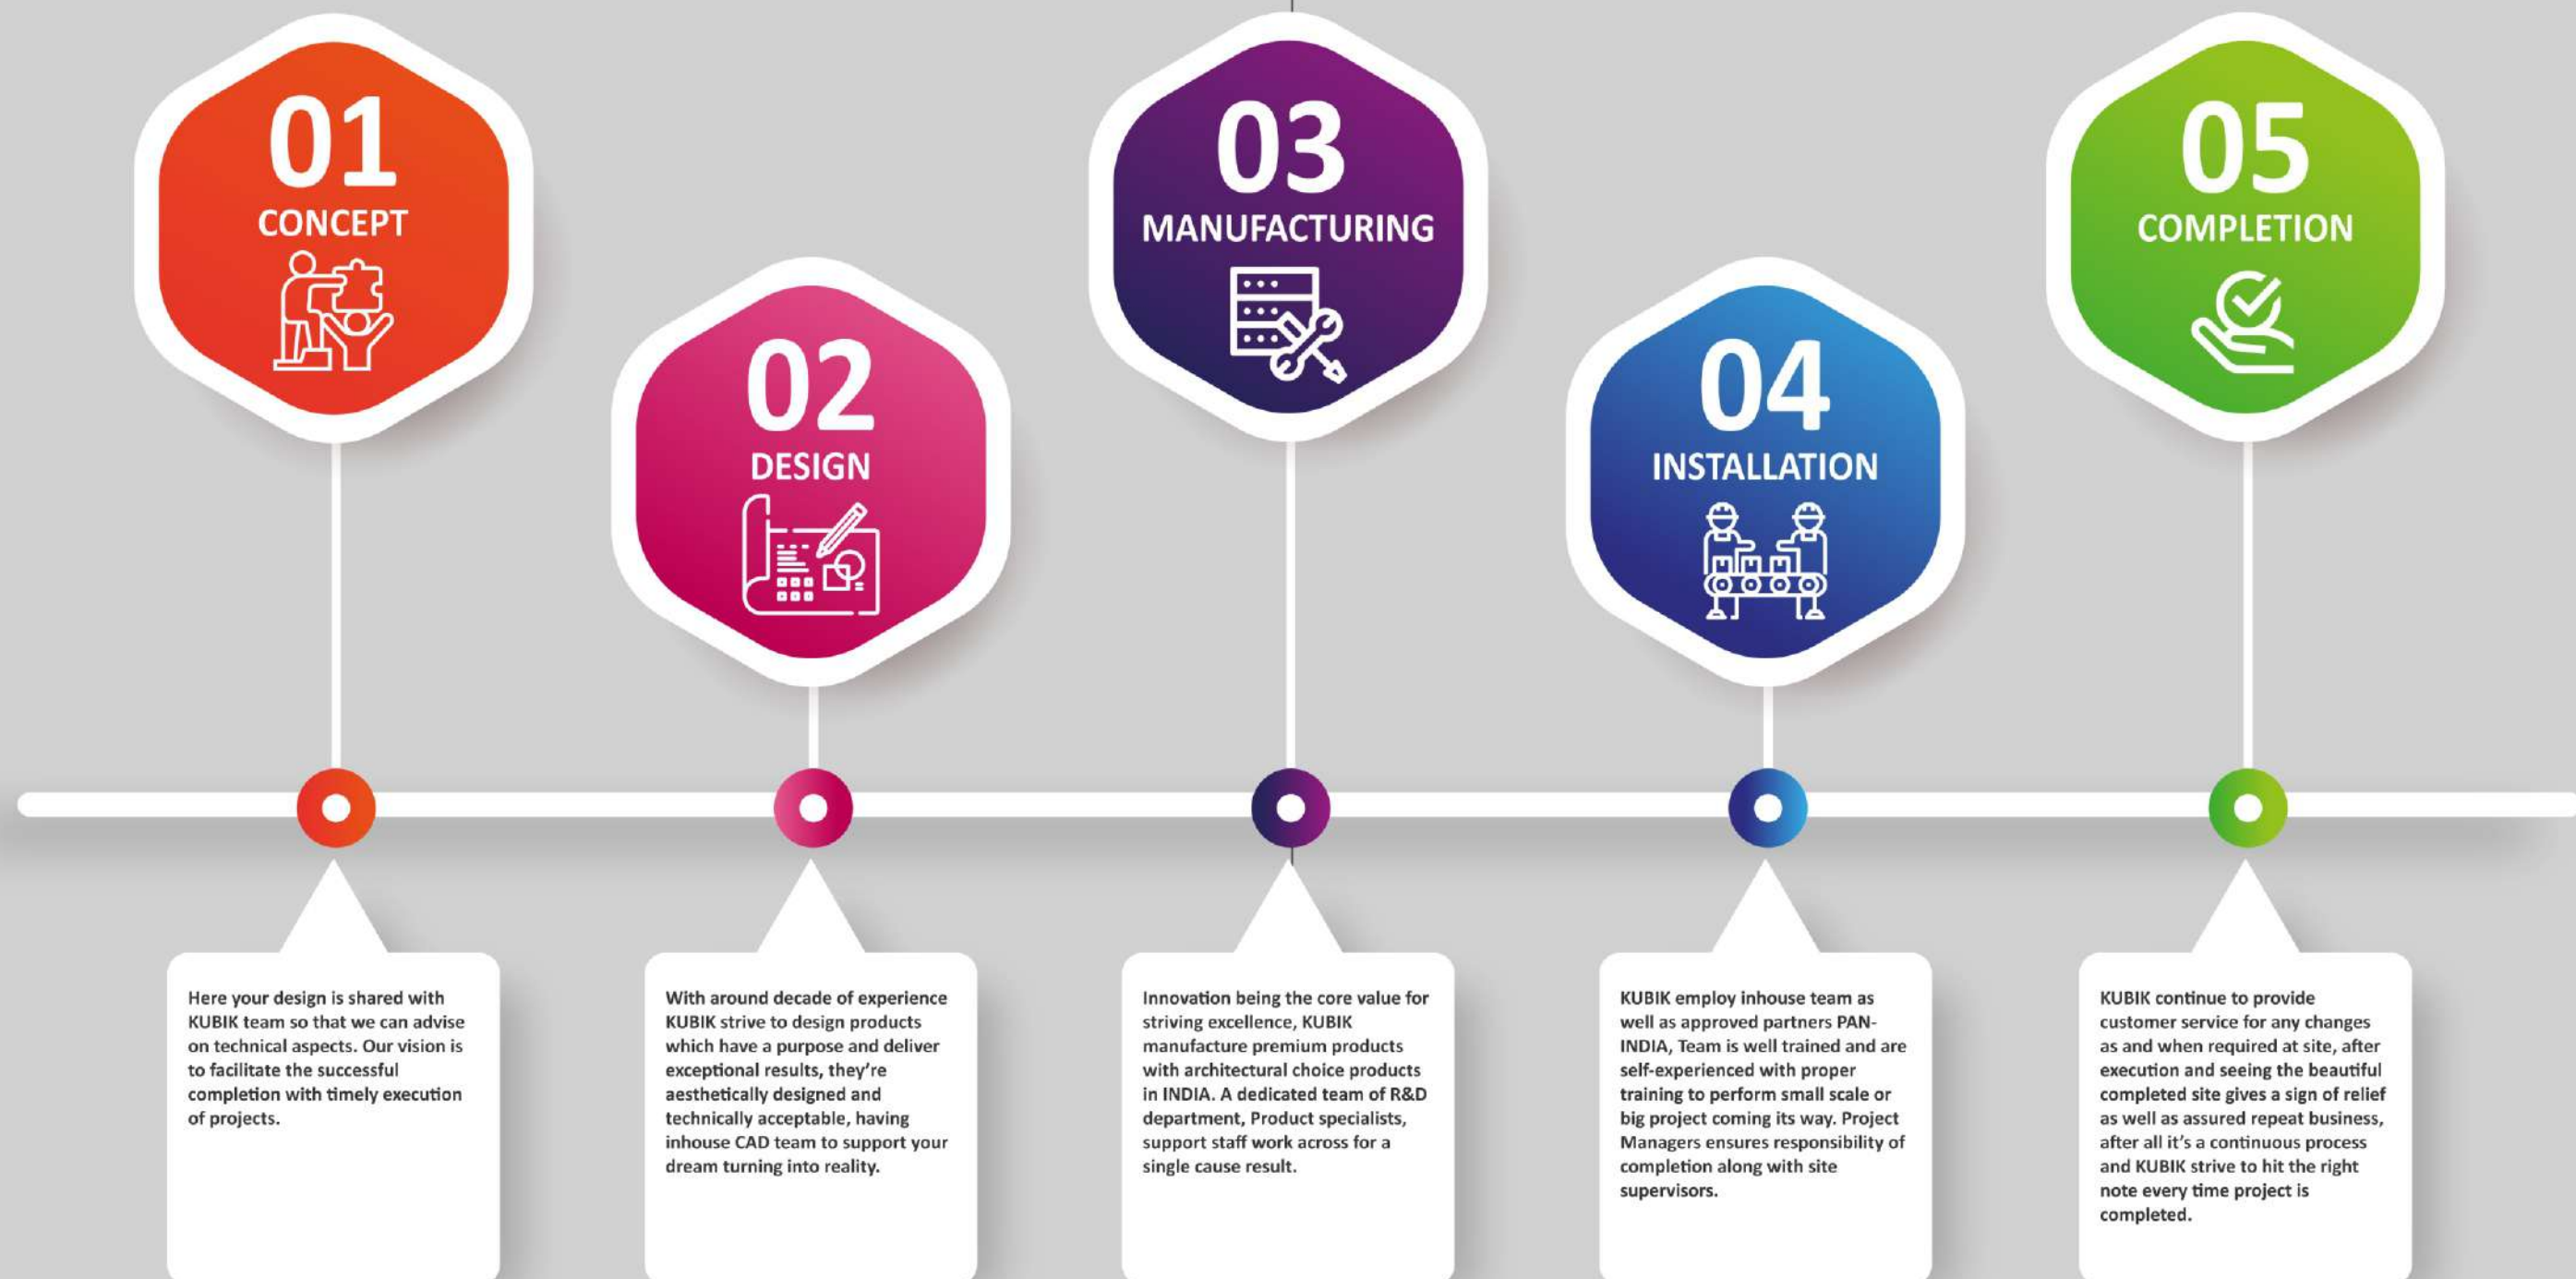

Partners - Nurture a winning network of customers and suppliers, together we create mutual, enduring value.

Productivity - Be a highly effective, lean and fast-moving organisation.

Our company KUBIK INDIA PVT LTD is committed to preserving environment and enhancing the quality of life in communities we serve.

### **CONTEMPORARY WORKING SPACES WITH MINIMALISTIC APPROACH.**

DOTLINE series Demountable office partition can be equipped with strong acoustic insulation for more relaxing atmosphere within the large office spaces with minimal section visibility and creating multiple options of solid door or tempered glass which can be installed along with selection of door frames.

## DOTLINE 25

### Technical Specifications

#### CONTEMPORARY WORKING SPACES WITH MINIMALISTIC APPROACH.

DOTLINE series Demountable office partition can be equipped with strong acoustic insulation for more relaxing atmosphere within the large office spaces with minimal section visibility and creating multiple options of solid door or tempered glass which can be installed along with selection of door frames.

#### Features

- Standard track section : 25mm x 25mm and 25mm x 40mm
- Slim in design, the standard partition suite can be used with any stud thickness.
- Suitable for 10mm / 12mm toughened glass as well as 10.52mm / 12.52mm laminated.
- Single door frame sizes to allow for flush door 44mm and for rebated door 54mm.
- Partition height can be offered upto 3000mm.
- Single glazed systems.
- Sound insulation capacity of 32 - 36 dB.

#### Door Options

- Frameless glass, Stile glaze door, Timber or Sliding door system.

#### Solid doors

- Timber doors can be of 44mm solid core in choice of veneers.\*

#### Door frames

- Aluminium full height up-to 3000mm, Doors are mounted on the either hinges, pivots or sliding tracks. A range of Ironmongery can be supplied and incorporated with Dot line series

#### Size Limits

- Kubik is designed for installation in areas up to nominal vertical panel size of 3000mm x 1200mm.

#### Finish

- All exposed Aluminium sections are Anodized Aluminium finish with 6463 T6 Grade.

#### Panel Finish

- Laminate, Melamine, Whiteboard, Veneer, Vinyl, Powder Coated Steel And Pinnable Fabric. These Finishes Can Be Applied In Any Combination.\*

#### Assembly Characteristics

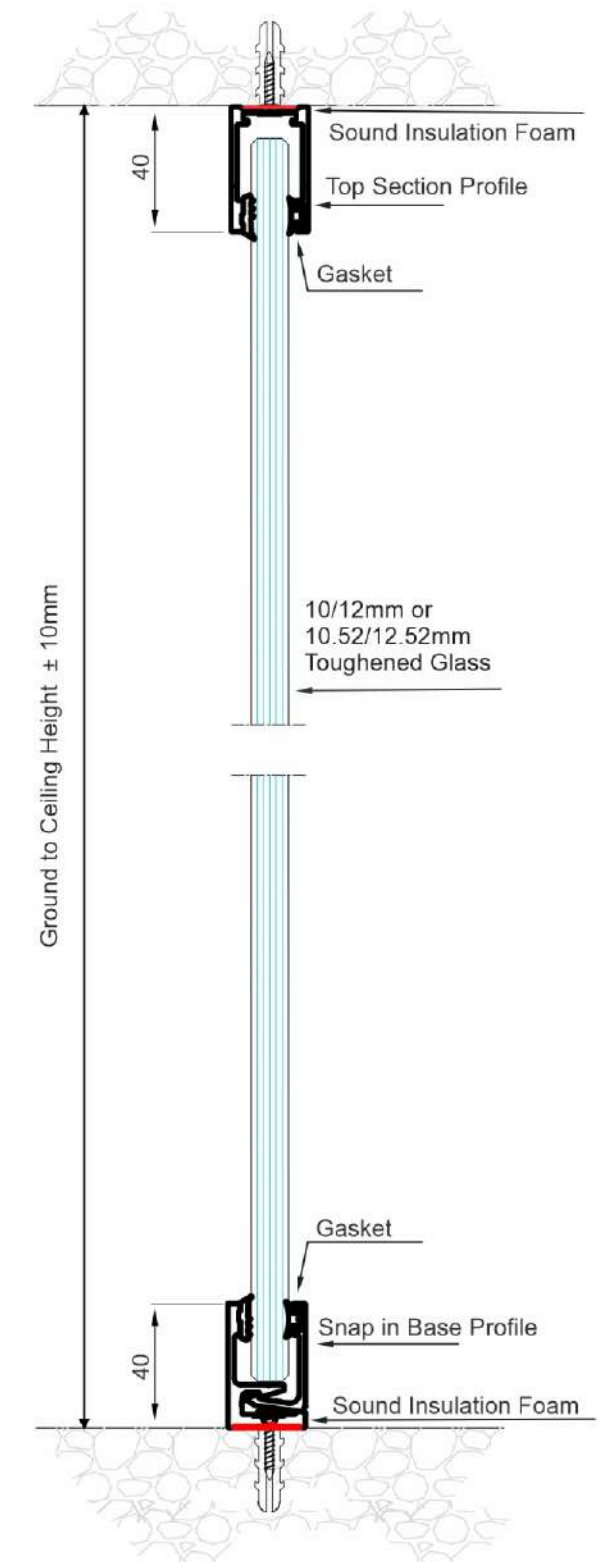

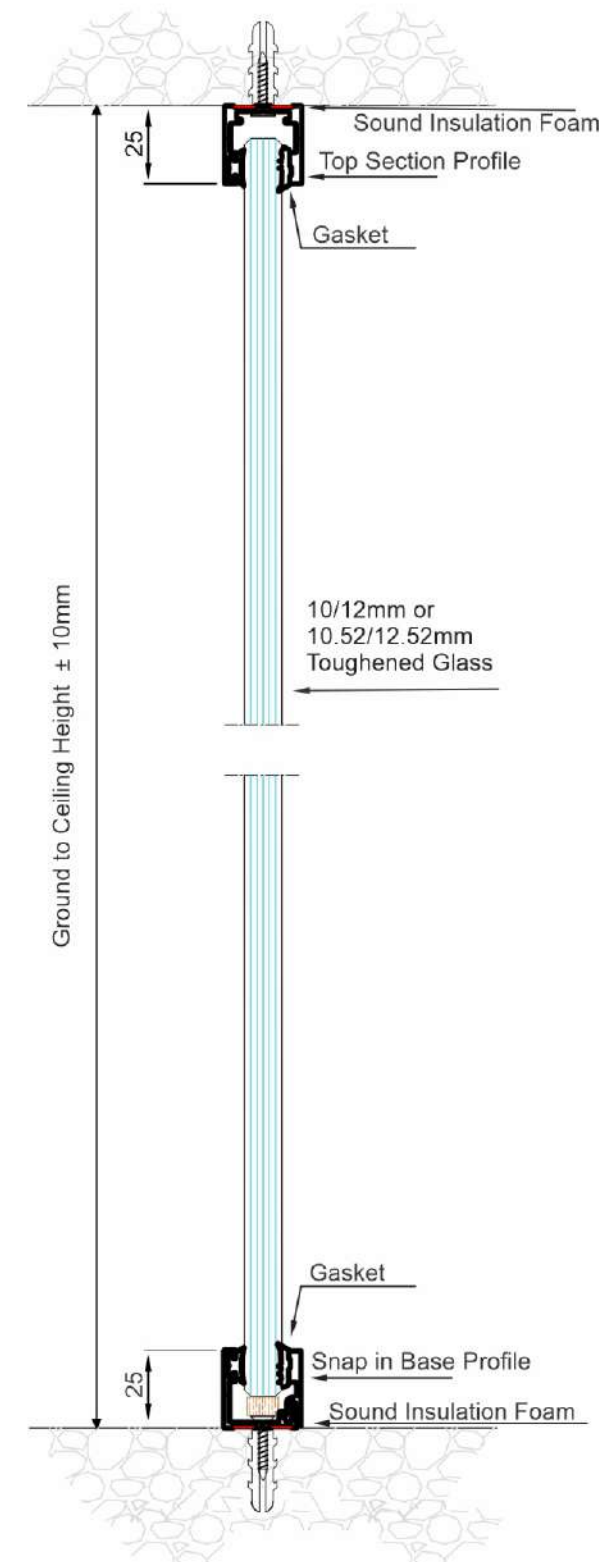

Glazed panels are hung onto a site installed framework of recessed head, side walls and base channels, studs and transoms. Base tracks have a snap in profile for better installation of glass into section using beads made of silicone gel material and choice of junctions available. Assembly jig supplied ensures the speed and accuracy of the installation and correct alignments of panel. All panels can be removed independently of each other allowing replacement or variation at any time after initial installation

Available in two Colors

- 45 x 50 series (Compact series)
- 80 x 80 series (Eta Portal)
- 100 x 100 series (Eco line Portal)

KUBIK Tech panel not only provides acoustic values which strengthen the integrity of the room, but also conceal all power and data cables required for electrical switches/devices embedded within the Tech panel face.

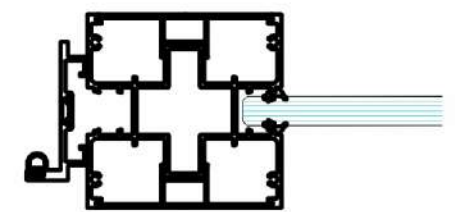

Ideally, room booking systems are mounted on an adjacent wall outside meeting room, which can be problematic if the meeting room front is of glass construction, since wiring and fixing cables can not be kept open, with KUBIK Tech panels things become easy since all cabling gets concealed within the cavity for meeting aesthetic and usability.

Meeting rooms are mostly occupied for multiple meetings and conference spaces, these KUBIK Tech Panels provides the necessary tool for booking system, This piece of technology allows people to see if a meeting room is available or in use, as well as viewing information in meeting scheduler about the meeting which is going to take place in that cabin.

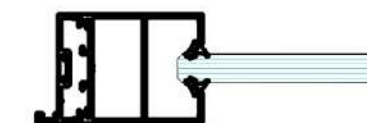

Available with 2 finish: Anodized Aluminium and Matt Black finish, readily available at any given point of the shelf.

100 x 100 series (Eco line Portal)

80 x 80 series (Eta Portal)

45 x 50 series (Compact series)

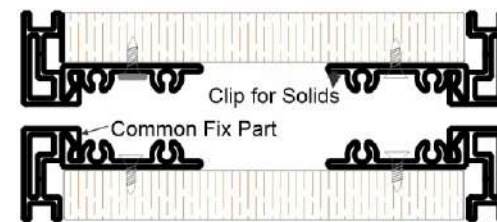

## POWER PANEL

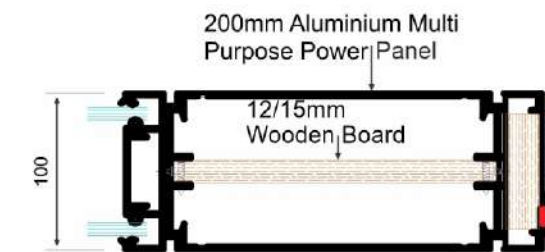

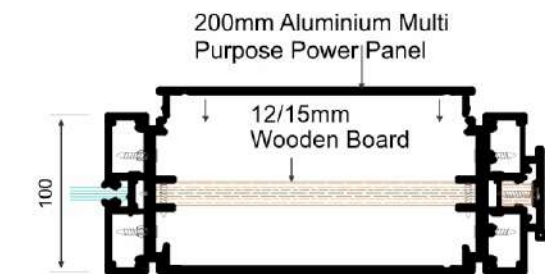

KUBIK Power panel plays a vital role in today's commercial industry, using access system is a must for maintaining privacy as well as confidentiality within. With meeting scheduler coming into role the size of panel required is more than regular size available in market, KUBIK with its R&D team have come up with 100 mm to 600 mm portal where all systems can be integrated with ease meeting aesthetic value as well as acoustic performance.

### **CONTEMPORARY WORKING SPACES WITH FOCUS ON GLASS.**

The simple efficient functionality of FINESSE walls offers build in flexibility that responds to the constant rhythm of business change, with large selection of aesthetic choices, you can move beyond permanent dry wall solutions and rigid space planning to create flexible and usable workspace solutions which are ready to reconfigure and walls that are easy to relocate for whatever change the future brings.

## FINESSE 100

### Technical Specifications

#### CONTEMPORARY WORKING SPACES WITH FOCUS ON GLASS.

The simple efficient functionality of FINESSE walls offers build in flexibility that responds to the constant rhythm of business change, with large selection of aesthetic choices, you can move beyond permanent dry wall solutions and rigid space planning to create flexible and usable workspace solutions which are ready to reconfigure and walls that are easy to relocate for whatever change the future brings.

#### Features

- Demountable glass partition, 100mm thick
- Maximum height : 3000mm (depending on elevations),  
For bigger heights, reinforcement of the structure required.
- Aluminium profiles : Silver/Black anodized or RAL powder-coated.
- Any configuration possible : Full height, Segmented, Segmented at door height, multi-transoms, etc.
- Cove visibility of 25mm on top and bottom.
- Glazing seal(Gasket) available : Black & White.
- Glass of 5 or 6mm can be used according to the requirement.

#### • Hinged doors :

- laminated wooden door.
- Aluminium-framed glass door, single or double glass.

#### • Options and accessories :

- Blinds with horizontal or vertical slats.
- Integration of light switches into the door jamb.
- Automatic drop seal for wood, aluminium-framed and glass doors.
- Concealed door closer.

#### • Acoustics :

- Glass wall : STC = from 38 to 44 dB.
- Door set : STC = from 34 to 38 dB.

#### Size Limits

- Designed for installation in areas up to nominal vertical panel size of 3000mm x 1200mm.

#### Finish

- All exposed Aluminium sections are Anodized Aluminium finish with 6463 T6 Grade.

#### Assembly Characteristics

Glazed panels are hung onto a site installed framework of recessed head, side walls and base channels, studs and transoms. Base tracks have a snap in profile for better installation of glass into section using beads made of silicone gel material and choice of junctions available. Assembly jig supplied ensures the speed and accuracy of the installation and correct alignments of panel. All panels can be removed independently of each other allowing replacement or variation at any time after initial installation

Available in two Colors

- 5mm glass thickness possible
- Compatible to european hardware
- Conceal Door Closer for better aesthetic
- High acoustic level performance

- 35 series stile door
- Stick-on profile possible
- Compatible to european hardware
- High acoustic level performance
- Slimmest of all available stile door

## DOOR CONFIGURATIONS

- Side Hinge Door (Signitive Series)
- Screening possible
- Compatible to European hardware
- High acoustic level performance
- Various glass type available
- Bottom lock possibility.

- Slimmest door design of minimal Rebate 35
- Brooklyn possible
- Compatible to European hardware
- Open door closer for smooth functionality
- Drop down seal gives high acoustic results
- Designed for flush visual from both sides meeting aesthetic value.

## DOOR CONFIGURATIONS

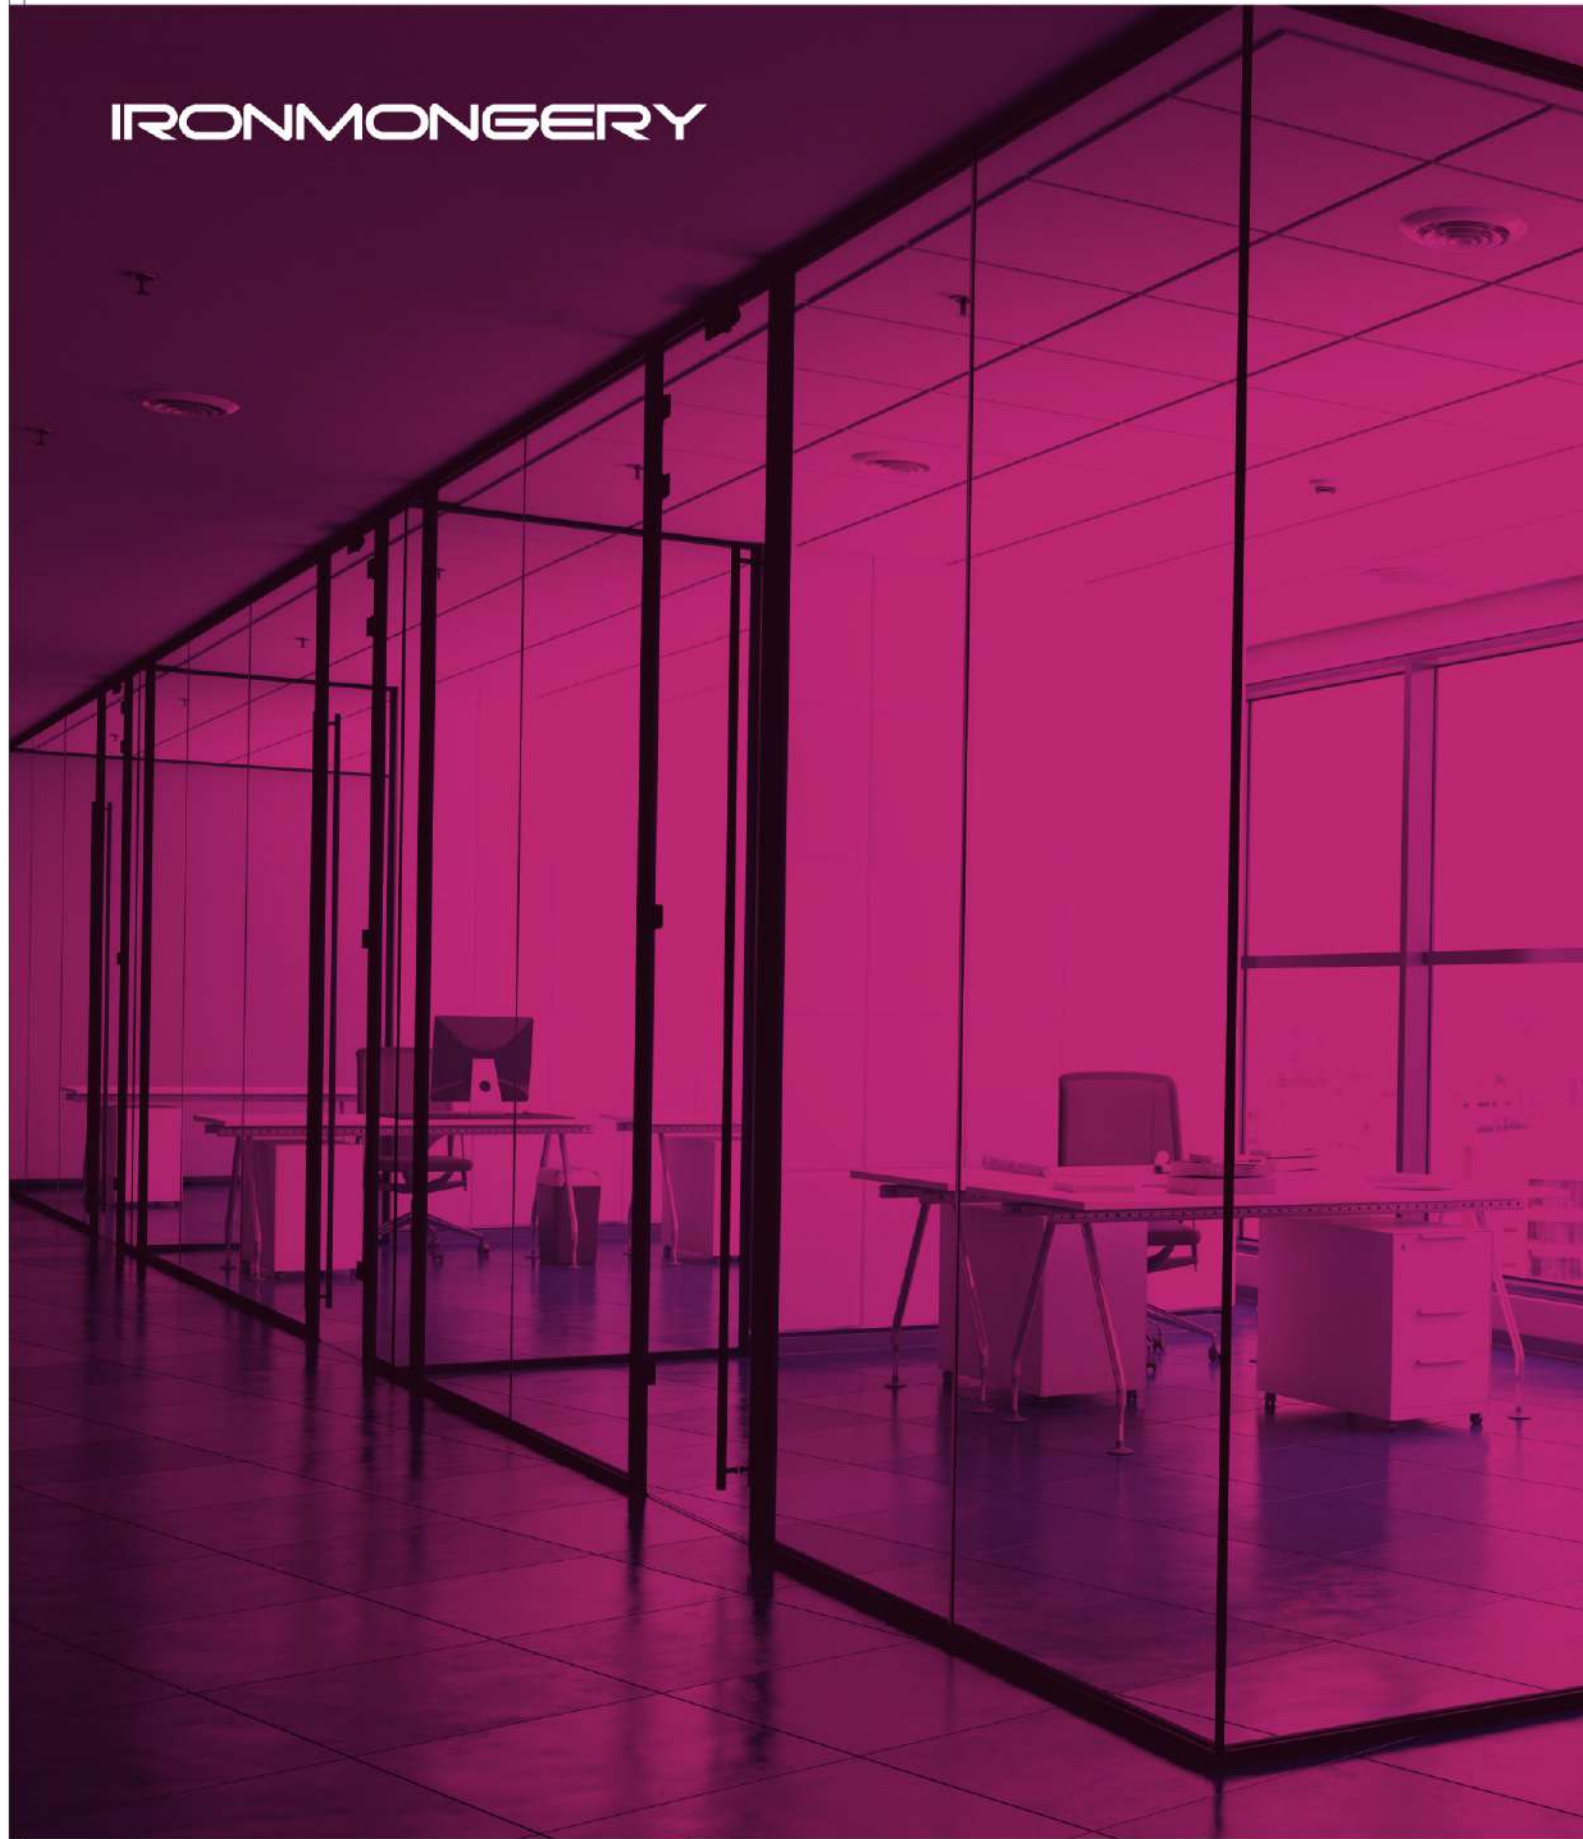

- Door thickness +38mm
- Sound insulation upto 38dB
- Regular finish available to match your need
- Wood look possible
- Ironmongery - kubik make
- Vision panel possible

- Door thickness +38mm
- Sound insulation upto 38dB
- Regular finish available to match your need
- Any color laminate possible
- Ironmongery - kubik make

## IRONMONGERY

## WOODEN

In KUBIK you will always find variety of options for wooden/solid door ironmongery, which enhances and create a safe environment for customers and staff, whilst ensuring that premises remains comprehensive and easy to use during heavy traffic zone.

KUBIK Concealed hinges are used instead of regular bearing hinges to provide aesthetic look as well as hide the hinges which is bulky as well as quite regular in design nowadays, Stile door or wooden flush door offers aesthetic continuity and fluidity with their invisible hinges and conceal door closer, Top and Bottom offset pivot hinges also can be used for creating niche effect and providing sturdiness on doors. (As shown in above image\*) These end-less variety of possibilities by KUBIK promotes space planning concept.

## GLASS

KUBIK's Glass door ironmongery collections ranges from contemporary to classic in order to cater for all architectural specifications, Studio Mortise handle with lock options creates a perfect solution for acoustic features along with Glass drop down seal and rebate doors complimenting each other, Hinges comes in great variant from Aluminium make to Stainless Steel make in 304 Grade. Door closer are used for self-closing mechanism along with Amateur plate and saddle plate in use. Privacy and Acoustic value being prime concern.

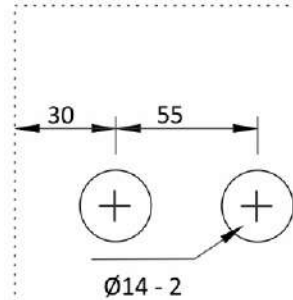

## ARMOUR SERIES

Sophisticated design and functional quality are the characteristic of the KUBIK fittings. They excel in terms of both technology and operating reliability manufactured from high grade materials and carefully crafted. KUBIK door hinges satisfies demands with respect to stability, safety and corrosion resistance.

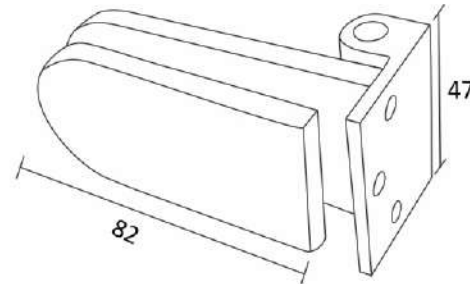

**KOPH 101 - SS**  
**KOPH 101 - BK**  
**Glass Door Hinges (Round)**

For glass thickness : 10mm to 12mm.

Cut-out detail

Available Finish :  Black  Silver

## SYMPHONY SERIES

Security a prime concern, what better than bottom patch lock which does that elegantly.  
KUBIK not only have regular bottom lock but with aluminium finish to give neat and same finish.

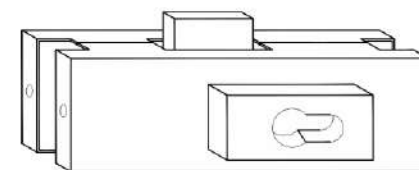

**KBL 101 - BK**  
**KBL 201 - SS**  
**Glass Bottom Lock**

KUBIK material consists of Alloy Material.  
Lock comes in Black Finish & Stainless Steel Finish.  
For glass thickness : 10mm to 12mm.

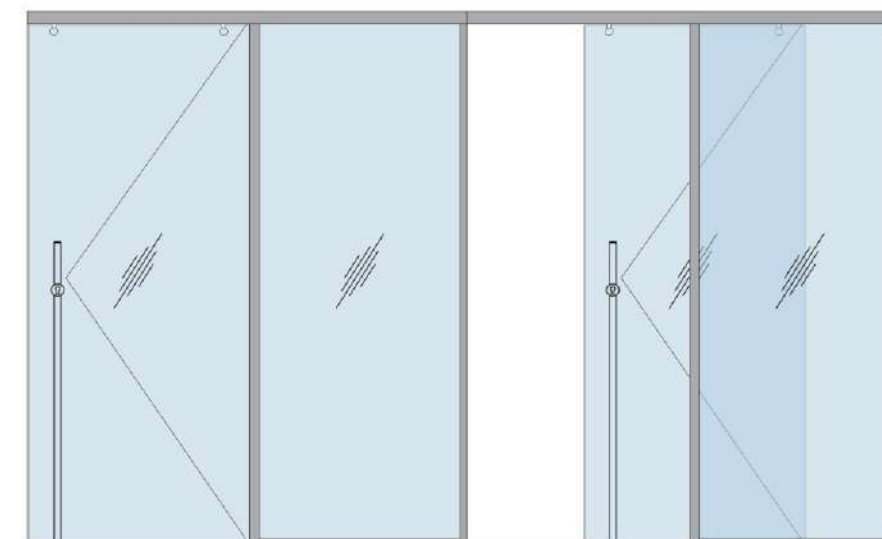

Cut-out detail

Available Finish :  Black  Stainless Steel

## SLIDO SERIES

Sliding door system enables glass doors to retain their minimalist aesthetics.

Sliding glass doors provide huge space benefit, minimalist design and combined with proven roller technology ensure that even high doors can be operated smoothly and with ease.

The door are gently decelerated as well as being reliably hold in both their closed and opened states by specially developed catch type buffers.

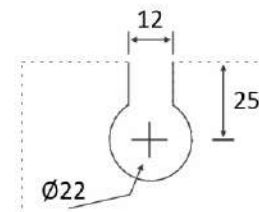

## SLIDO SERIES

**KSF - 022**  
**Slide Wheel**

KUBIK slide wheel easy to assemble.  
For straightway glass sliding door.  
For glass thickness : 10mm to 12mm.

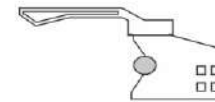

Cut-out detail

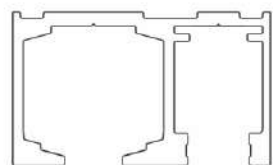

**Stopper**

For straightway glass sliding door.  
Material : PVC

**Bottom Guide**

Material consists of SUS 304.  
Bottom guide comes in Stainless Steel finish.  
For glass thickness : 10mm to 12mm.

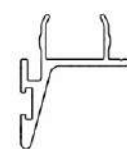

**KOPS - 036**  
**Slideline Sliding Track**

Material consists of Aluminium.  
Size : 3000 mm.

**KOPS - 036A**  
**Slideline Cover**

**KOPS - 036B**  
**Slideline Cover**

## SLIDO SERIES

A revolution in sliding system from KUBIK slido series, which enables a proper utilization of space with hustle free movement where space is the core concern, ideally suggested for Co-working spaces where minimum space is transformed into maximum value.

- Soft Closing mechanism support both ends,
- Minimum gap – 2mm between channel and shutter,
- Inbuild brush provides dust free movement,
- Rollers make smooth slide,
- Hustle free movement.

## Soft Close

**KSF - 022 Soft**  
**Slide Rollers**

KUBIK slide rollers for wooden / aluminium door application.  
Inbuild brush for zero maintenance  
For door thickness : 32mm to 45mm.  
Soft close mechanism for smooth functionality

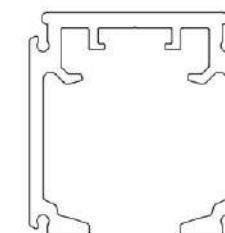

**Stopper**

For straightway wooden / aluminium sliding door.  
Fits inside KOPS 057 Track  
Material : Metal + PVC

**Bottom Guide**

Material consists of SUS 304.  
Bottom guide comes in Stainless Steel finish.

**KOPS - 057**  
**Slideline Sliding Track**

Material consists of Aluminium.  
Size : 3000 mm.

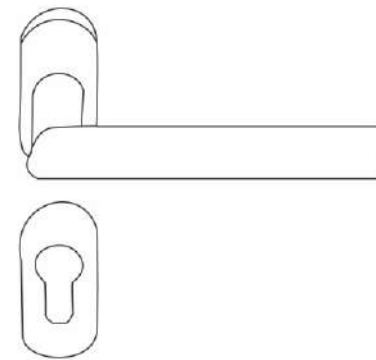

## PROJEXIS SERIES

Sophisticated design and functional quality are the characteristic of the KUBIK fittings.  
KUBIK hardware includes the most popular model all of which are right or left spring in order to return the lever handle to the horizontal position. KUBIK hardware is suitable for standard, national and international applications eg. in commercial spaces, school, mall segment and interior doors in office buildings.

**KLH 011 - SS**  
**KLH 011 - BK**  
**Lever Handle**

Lever Handle in Stainless Steel finish.  
Suitable for Aluminium Frame Doors & Flush Doors.  
Available with oval shape rosettes.

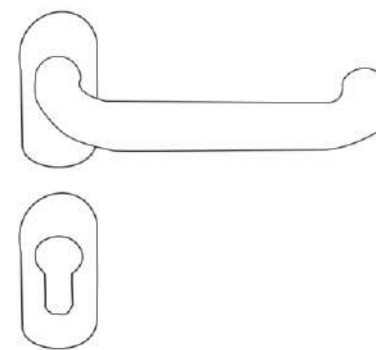

Available Finish :  Black  Stainless Steel

## INOVATIO SERIES

### Drop Down Seal - For Glass Door

Frameless glass drop down seal design to work for hinges type of door. It feature a high efficiency mechanism which lift the seal clear of the floor as soon as the door is the opened by a few mm, resulting in lower door operating forces. It includes covering section for an attractive finishing on the visible side, having a horizontal angle line on the under side for easy and accurate assembly.

Special adhesive strip for glass and synthetic materials provided. It is non reversible and needs to be ordered left or right handed.  
Suitable to glass door thickness of 10mm - 12mm.

### Drop Down Seal - For Wooden Door

KUBIK threshold seals perform an essential role in smoke containment for door assemblies and are also an essential part of an acoustic sealing system.

This range of automatic threshold seals includes options for easy face-fixed installation or discreet mortising into door leaves, for both medium and heavy duty applications. A spring-loaded mechanism, requiring no power, ensures easy door operation and effective sealing when closed.

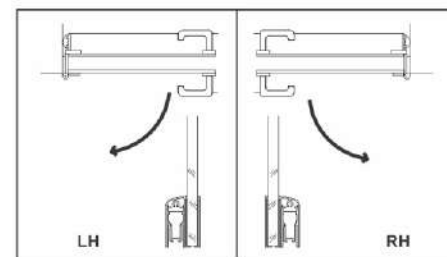

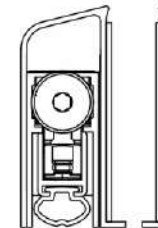

## INOVATIO SERIES

### KGDS Drop Down Seal - for Glass Swing Door

KUBIK seal consists of Aluminium Material.  
Drop down seal comes in Aluminium Anodized finish.  
For glass 8 / 10 / 12mm.  
It can be cut upto 100mm from available size.

## SILENT BOX

*New* *Exclusive*  
series

## SILENT BOX

THE CONVENIENCE OF SOUND INSULATION  
AND THE COMFORT OF SOUND ABSORPTION.

Open office spaces are becoming increasingly more common, although great place for team collaboration, this work environment possess issues when it comes to confidential; office calls.

KUBIK office phone booth provides a comfortable, sound-proof space for confidential phone call, private video conference, or just take a minute to quietly collect your thoughts still exist and rejuvenate or silent retreat for uninterrupted work.

KUBIK phone booth has no base and stands directly on the floor of your office, making it safe, quick to install and easy to relocate. A versatile, practical and dynamic phone booth that is part and parcel of a new way of conceiving the workspace.

### Different Types of Phone Booth / Meeting Booth

**Soundproof:** Engineered by leading acoustic experts so private conversations stay private.

**Ventilated:** Discreet fans and ventilation system keep you cool even during heated conversations.

**Flexible:** Adaptive design makes the booth easy to move around the office or into your next one.

**Sustainable:** Soundproofing materials made out of recycled plastic bottles means more room for the environment.

## PROFILE COLOUR VARIANT

In today's day and time, people are becoming more conscious of their design choices. The aluminium profiles and frames often come equipped with multiple options of frameworks and finishes which assist in indoor usage. Another factor which works in favor of Anodized or Powder coated aluminium profiles is its comparative superiority over other materials. KUBIK provides ease of availability throughout PAN-INDIA.

## GLASS COLOUR VARIANT

The true beauty of glass, lies in its appearance. Customization of shades, smooth and easy to maintain surfaces and lots of daylight to keep the building's occupants productive are only a few of the advantages of using glass for commercial building's premises. We have curated a palette of materials and finishes to choose from, but every element may be modified to meet a designer's specific needs, with KUBIK literally anything is possible.

## CREDENTIALS
